Jared Max Gurr
San Tan Valley, AZ 85140
480-442-1701
jargurr12@gmail.com

Objective:
A position that would allow me to utilize my skills in programming with MySQL, Java and general backend web development.

Education:
High School Diploma (2011)
  -Skyline High School, Mesa, AZ

Current Major Progress:
Associate of Computer Science
  -Chandler-Gilbert Community College

Portfolio:
- http://jaredgurr.com

Codewars profile:
- https://www.codewars.com/users/Nosferatu123

Tech Skill Levels (1-10):

Skill	Level
BASH	5
VIM	6
REGEX	4
JAVA 8+	6
VERT.X	4
SPRING	4
RXJAVA	3
MYSQL	6
DOCKER	5
GIT	4
NODE.JS	3
JAVASCRIPT	4
HTML/CSS	4
JQUERY	3
LINUX	4
COUCHBASE	2

Recent Experience:

Java Fullstack Developer March 4, 2018-Present
- Created several websites for clients and as personal projects which are online today, and which are using purely my own HTML/CSS/JavaScript/JQuery code, along with Node.js or Java and MySQL code on the backend. (See Portfolio)
- Each project I made runs entirely within Docker containers, and is version controlled using Git/GitHub.
- Completed many programming problems and challenges with Java/JavaScript on codewars.com.
- Gained skill using Vert.x Toolkit and RXJava in my Java applications so that they can be Asynchronous and Reactive.
- Built some apps using Spring-boot and became familiar with Inversion of Control mechanism using dependency injection as well as RESTful api. Also learned to use JPA and Hibernate to work with MySQL databases.
- Created many reusable, modular microservices and unit tests using Vert.x and Spring.
- Held meetings twice per week with a mentor who has 20+ years experience with Software Development and who helped guide me towards certain technologies and who also gave me advice for good programming practices and skills to focus on. (see Referrals)
- Consistently followed good development practices such as Test-Driven Development and providing solid documentation.
- Familiarized myself with alternative NoSQL Database technologies such as Couchbase, Redis, Cassandra, Neo4J and MongoDB.

Full-Time Phone/Chat customer service Rep from Home with GC Services/Apple
Feb. 28, 2017-April 16, 2019
- Provided support for customers with issues on orders of iPhones, iPads, Macs, and any other Apple Products found on apple.com.
- Warmly greeted and helped resolve customer issues. Reassured customers to be confident in the process with their orders.
- Often helped answer customers' technical questions for Mac computers or phones/tablets.
- Provided contact information and links to helpful organizations, or transferred directly to other support teams such as credit and Billing support as needed.

Qualifications:
- Strong communication skills, especially good at receiving and following directions.
- Able to begin and finish tasks independently.

- Very capable of working in a team environment or on a group project.
- Self taught to program, along with guidance/mentorship from an expert developer.
- 3 years experience developing apps and programs in various languages.
- Physically healthy, energetic and ready to learn new things.
- Capable of using Microsoft Word, Excel, and PowerPoint effectively.
- Deep understanding of computer hardware and operating systems, especially Linux.
- Plenty of experience using Docker Containers and Docker-Compose to run various apps/projects with.
- Adept at building apps with Test-Driven Development principles as well as the DRY principle and other important code-writing principles.
- Understanding and experience with various Java design patterns such as Builder, Factory, and MVC (Model-View-Controller).
- Capable of using HTML/CSS/JavaScript

Other:
- Completed 2 courses of American Sign Language in Undergraduate School (2011).
- Eagle Scout (2011)
